

## Exercise 1: Mocking and Stubbing

```
package com.cts;

import org.junit.jupiter.api.Test;

import static org.junit.jupiter.api.Assertions.assertEquals;
import static org.mockito.Mockito.*;

public class Exercise1_MockingTest {

    @Test
    public void testExternalApi() {

        // Create mock object
        ExternalApi mockApi = mock(ExternalApi.class);
```

```

        // Stub the method
        when(mockApi.getData()).thenReturn("Mock Data");

        // Inject mock into service
        MyService service = new MyService(mockApi);

        // Call the method
        String result = service.fetchData();

        // Verify result
        assertEquals("Mock Data", result);
    }
}

```

The screenshot shows an IDE terminal window with the following output:

```

[INFO]
[INFO] Tests run: 9, Failures: 0, Errors: 0, Skipped: 0
[INFO]
[INFO] -----
[INFO] BUILD SUCCESS

```

## Exercise 2: Verifying Interactions

```

package com.cts;

import org.junit.jupiter.api.Test;

import static org.mockito.Mockito.*;

public class Exercise2_VerifyInteractionTest {

    @Test
    public void testVerifyInteraction() {

        // Step 1: Create a mock object
        ExternalApi mockApi = mock(ExternalApi.class);

        // Step 2: Create the service using the mock object
        MyService service = new MyService(mockApi);

        // Step 3: Call the method
        service.fetchData();
    }
}

```

```
}  
    // Step 4: Verify that getData() was called  
    verify(mockApi).getData();  
}
```

The screenshot shows an IDE terminal window with the following tabs: PROBLEMS, OUTPUT, DEBUG CONSOLE, TERMINAL, and PORTS. The TERMINAL tab is active, displaying the following output:

```
[INFO]  
[INFO] Tests run: 10, Failures: 0, Errors: 0, Skipped: 0
